Subject: Planning Applications

For the attention of the Aberdeenshire Planning Department.

I have been asked to write on behalf of Braemar Community Council with regard to two planning applications:-

APP/2016/3239 the Junction of Mar Road and St Andrews Terrace. It is noted that the Aberdeenshire Roads Department wish to make comments regarding this application and the Community Councillors were asked about the junction width, width of pavements and disability access. It would be appreciated if the Community Council could be made aware of the Road Department input and thus make a more informed decision.

APP/2016/3288 Chairlift at Glenshee Ski Centre. At the recent Community Council meeting there was unanimous agreement to support this application as it improves the infrastructure at the Ski Centre and thus has the potential to bring more visitors to the area during the winter months, creating more employment opportunities for the community.

It also has the added benefit of a smaller footprint on the land than the current "T Bar" lift.

Your Sincerely
Alasdair Colquhoun,
Community Councillor.
