Theme	Aim	Issues/Obstacles				
Speeding	To reduce the speed limit within the village from 40mph to 30mph. To encourage less dangerous overtaking within the village	<ul style="list-style-type: none"> Requests to the appropriate authority, to have the speed limit reduced from 40mph to 30mph, have met with little success. A886 being a trunk road has always been used as the excuse to take no action. Feeling in the village is now running very strong with many villagers experiencing "near miss" accidents. Other communities on trunk roads seem to have been able to have speed limits reduced and road safety measures such as rumble strips etc installed.

Village Water Supply	Improve Water quality and reliability of supply	<ul style="list-style-type: none"> The village recently had a new water treatment plant installed. Previously the village enjoyed a very good and palatable water supply with little or no disruption. The village was never consulted on the installation of the new plant. Since its installation the village has suffered from the unreliability of the new system and fluctuating water pressure. The quality and taste of the water is now unpleasant. Emergency water distribution has been erratic with some houses having to fend for themselves. No warnings about disruption to supplies being given. Reaction to phone calls very slow. Many phone calls not returned.
