Guidance:

Under the Gaelic Language (Scotland) Act 2005 the Bord may require public authorities to submit a monitoring report on progress regarding delivery of their plan's outputs. The purpose of this is to provide the authority with an opportunity to measure progress, to take remedial action if necessary and in addition to note where progress has been greater than anticipated. The reporting process is also intended to support the organisation to plan in advance of the review required prior to renewal of its plan, to take account of lessons learned, and to measure the plan's impact across the organisation's policy and planning process.

The template provided below is the Bord's recommended monitoring report format. It includes a colour code system to indicate progress on output delivery and a key is provided regarding this.

By way of general guidance for the monitoring process the Bord encourages the following:

- That for all actions a clear measure of progress is included, with the qualitative and numerical increase recorded.
- Where there has been a delay in progress or no progress that this is clearly stated, with an explanation of why this has occurred and what the response is.
- That a 'lessons learned' section is included at the end of the report.

The Bord will use this template when assessing monitoring reports. We will also look at the wider picture in terms of delivery on equal respect; active offer; mainstreaming; the development areas and key language planning categories contained in the National Gaelic Language Plan; workforce planning and overall performance. Our response will be based on what is evidenced in the report.

Bòrd na Gàidhlig response to CNPA Progress Report 2016

The Cairngorms National Park Authority is making progress towards the commitments in their Gaelic Language Plan and this is evidenced in the report. Most commitments are either going to plan or will be completed before the end of the first Plan iteration. The authority is promoting understanding and visibility of Gaelic within the Park. However, the following points are of concern:

• The authority could be more actively strengthening the Park's Gaelic image, through the work of the authority and its partners – we have invited Christie Maclean to prepare a *Gaelic as an Asset* section on our website which will provide advice on how to strengthen and benefit from the Park's Gaelic image. In addition Roddy McLean ran 3 training courses for partners and community representatives on 'Gaelic – Nature in the Landscape' in September 2016.

• The Bord recommends that the authority ensures that there is an equality of respect – and usage – in all logos associated with the Park and that Gaelic runs through all Park and authority branding and marketing materials as a normal part of the cultural heritage of the area, both externally and internally – the CNPA is developing a methodology/guidance for use of Gaelic in partner/visitor facing publications and on visitor websites/pages. CNPA does not directly control the use of logos associated with the Park (we only control the use of the CNPA corporate logo and provide guidelines for the use of the CNP brand identity). CNPA will review the opportunity to render the CNP brand identity as bilingual, demonstrating equal respect for Gaelic and English, at the first opportunity on rebranding/renewal. Due to the cost associated with the replacement of the Park entry markers this is not expected to take place within the next GL Plan period.

• The Bord recommends that Gaelic is considered within new developments of the website at the planning stage and not afterwards - we have invited Christie Maclean to prepare a new Gaelic as an Asset section on our website and Gaelic will be considered at the planning stage for this section of the site.

• The Bord recommends that the authority looks to acquire a staff member with Gaelic skills on a renewal basis, possibly in the Communications Department, as this would help the authority deliver its primary aims – recruitment for two new posts where Gaelic Language Skills were identified as desirable took place in 2017 but none of the applicants were able to meet this desired requirement. Another two posts are currently being recruited where Gaelic is identified as desirable. We have invited Christie Maclean to prepare a new Gaelic as an Asset section on our website and will explore opportunities for a Gaelic Language student to work with the CNPA on an internship basis to deliver identified Gaelic Language projects.
