FOR DISCUSSION

Title: CAIRNGORMS NATURE ACTION PLAN MID-TERM REPORT

Prepared by: ANDY FORD, HEAD OF CONSERVATION

Purpose

1. This paper presents the Cairngorms Nature Action Plan mid-term report.

Recommendations

2. The Board is asked to:
 - a) Note that, overall, delivery of the Action Plan is progressing very well. 83% of targets and actions are considered as either complete or progressing as expected; 11% are delayed or requiring additional effort, largely due to COVID-19 restrictions during 2020/21; 4 % are considered to be at significant risk of not being delivered; and 2% are unreported.

	High risk of not being delivered	Delayed and/or requires input	On-track	unreported
Actions	2	8	72	1
Targets	3	5	30	2
TOTAL	5	13	102	3

- b) Note the three areas of work that are assessed as being at serious risk of targets not being met or work not progressing satisfactorily:
 - i. Peatland restoration target
 - ii. Expansion of raptor home range occupancy and breeding success
 - iii. Capercaillie population status
- c) Note the diversity of conservation delivered by a wide range of land managers, estates, organisations, communities, groups and individuals; and the contributions they make to the collective delivery of the Cairngorms Nature Action Plan, as highlighted in this short film <https://we.tl/t-BVAvWu8SID>
