Notes

- 1. Current best information is that we will achieve:
 - a) Close to break even against core Resource Departmental Expenditure Limits (R-Del) and Capital Department Expenditure Limits (C-Del) allocations, and
 - b) Under-spend against the Peatland capital allocation (£245,000).
- 2. £380,000 of peatland funding was not drawn down to allow for the underspend estimated at the end of February. There remains an underspend against peatland capital funding (£245,000). Work is ongoing to establish if all relevant costs have been accrued against the capital budget.
- 3. Two tranches of funding were allocated to Cairngorms 2030 during the year:
 - a) The committed annual contribution of £450,000, followed by
 - b) An additional £300,000 as an advance of funding to allow for procurement of design work on the 'active communities' projects.

Both amounts have been allocated against capital delivery, and budget has been reallocated between resource delivery and capital delivery to facilitate this.

4. Work continues to ensure that all relevant expenditure is reflected in the results for the year. Outstanding commitments have been accrued into the outturn position and so far, invoices received after 31 March, relating to the 2024/25 financial year, are matching well against these commitments.
