

11,000 Volt Overhead Line to facilitate compound for Beaully to Denny Line
Applicant: Scottish And Southern Energy

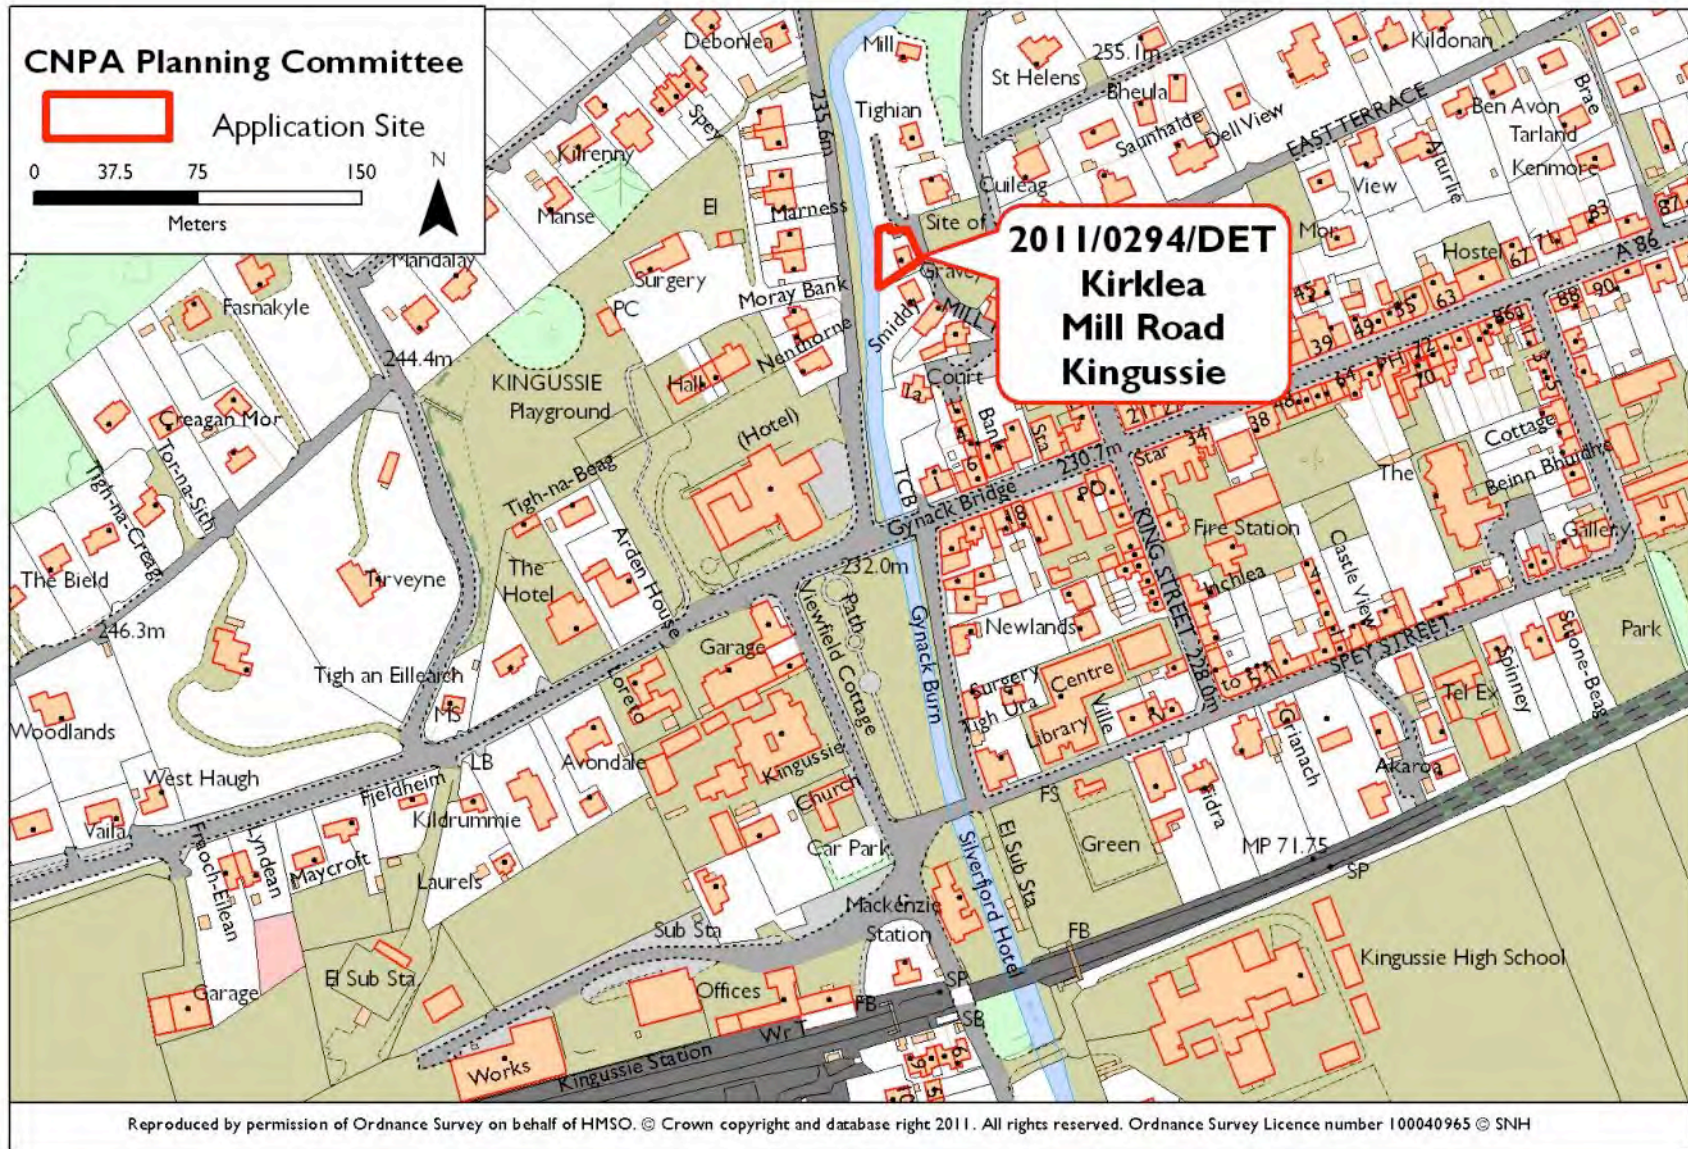

KEY POINTS

- This application is an overhead line notification (relevant parts in yellow) which the Park has no call-in powers over
- The proposal is to provide an 11kV overhead wooden pole line to a construction compound which has previously received permission from the CNPA (Ref 10/239/CP)

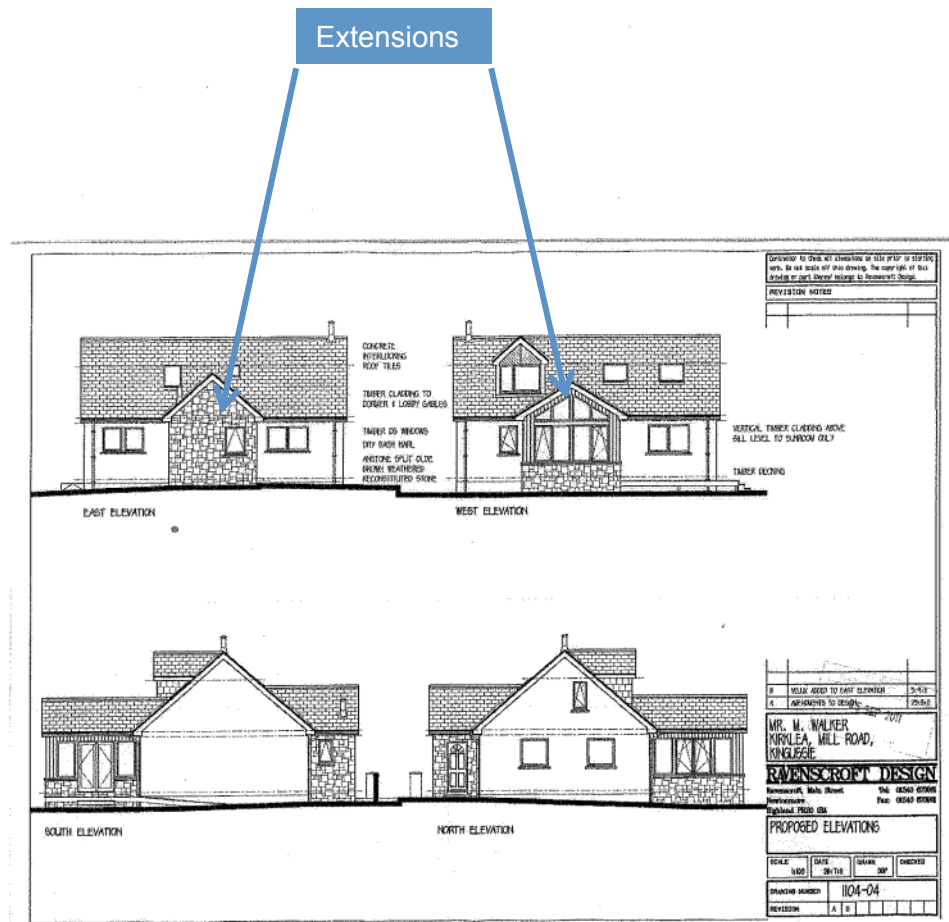

RECOMMENDATION: NO STATUTORY CALL-IN

COMMENTS: The compound received permission from the CNPA on a temporary basis for the construction of the Beauty-Denny line. The permission was subject to a condition that the site be restored once works are complete. In accordance with this the CNPA would comment that any additional overhead line for the compound should also be removed when the site is no longer required.
