- 11.09/093/CP - The decision was to call-in the application for the following reason :
 - This proposal is for the extraction and processing of stored river dredging aggregate material in association with the construction of the proposed Beauldy Denny Overhead Line Upgrade project. The site is located adjacent to natural heritage designations, and in close proximity to an existing archaeological resource (Crathie Township). The site is also accessed by an existing Right of Way and promoted path network. Due to the nature of the proposal in this sensitive location, the proposal is considered to raise issues in relation to the conservation of the natural and cultural heritage of

the area, the sustainable use of resources, the promotion of informal recreation, and the economic development of the area. As such it is considered to raise issues of general significance to the collective aims of the Park.
