Dear Sirs

Planning Application 10/00023/FULBS, Boat of Garten Caravan Site.

I write in respect of the neighbour notification I have received relating to the above application.

I have no objection in principal to the siting of 34 static caravans, however I do have some concerns regarding the possible loss of access along the pathway which runs along the boundary between the Caravan Site and Grampian Crescent.

I appreciate that this path is somewhat overgrown in places however I am aware that this access has been used for many years by residents of Grampian Crescent to have their oil and gas tanks replenished and serviced. It is also the only access that some of the terraced properties will have to their back gardens without going through the house.

I would therefore ask that a condition be applied requiring access to be maintained along this route.

Yours Faithfully

Archie Lang
