## CAIRNGORMS LOCAL OUTDOOR ACCESS FORUM

---

**Title:** Section 13 Duty Casework

**Prepared by:** Douglas Stewart, Outdoor Access Officer

**Purpose:** This paper provides an update to members on access casework for the current year to date.

### Advice Sought

No advice is currently sought from members. The period since the last LOAF meeting has seen a number of new cases arise, a proportion of these have been resolved while others are currently ongoing or to be investigated. These cases are similar to ongoing trends in that they are non-serious and generally not affecting key routes such as core paths.

### Summary of S14 casework currently in hand

<b>YEAR</b>	<b>2018</b>
<b>Live cases</b>	12
<b>Closed cases</b>	2
<b>TOTAL for year</b>	<b>14</b>
<b>Older cases (live)</b>	6
<b>TOTAL</b>	<b>14</b>

### Casework/Enquiries Handling Process

We are currently testing an improved, more comprehensive system of recording and processing casework/enquiries. The purpose of this is to improve the quality of recording, determine more precisely the volume and range of casework/enquiries received and handled and from this understand more fully the resource implications of this work.

In accordance with the above members will notice a more detailed recording sheet has been appended. Please note: this includes a considerable number of non S14 recording and members will principally be interested in records where the 'Issue Type' is recorded as 'access rights' although not all of these records have developed into casework.

In due course the SI4 records provided to members may be refined however at this stage it was felt worthwhile to supply the full list and in order that members are aware of the breadth and type of enquiries handled.
