Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I welcome this retrospective planning application. The main issue in this case are the borrow pits, which have not been properly restored and as a result have an adverse impact on the landscape. There is no plan to show how they could be better restored and as a result I wish to object to the application as submitted. I believe the CNPA should require a proper plan for restoring the vegetation in the borrow pits and merging them with the surrounding landforms
