I. Introduction

1.1 Purpose of this document

The purpose of this Project Initiation Document (PID) is to define the terms of reference and scope of the project. The PID will also form the basis for the management and assessment of the success of the project.

It ensures that all parties have a common and agreed understanding of the purpose of the project, the objectives, what will be delivered and the responsibilities in achieving the stated goals. Acceptance of this PID is taken to mean the above issues are understood and that commitment is given to providing the resources and effort identified as necessary for successful completion of the project. In this way this PID acts as a formal agreement between the Project Sponsor, and the project team.

1.2 Background

Tomintoul Quarry and Devil's Elbow, Glenshee are the two final projects being developed in 2015/16 as part of the Scottish Government Scenic Routes Project 2013-16

2. Project Definition

2.1 Aim

To develop two Scenic Routes installations at the lay-by north of Tomintoul Quarry on A939 and Devil's Elbow on A93 that meet the needs of the National Project and also stands alone as a quality installations on the developing 'Snow Roads' Scenic Route.

2.2 Objectives

Installation of competition winning Scenic Routes designs at both sites by spring 2016 within Scottish Government budget of £160,000 plus professional fees.

2.3 Scope

In Scope:

- Installation of the Competition winning designs
- Lay-by improvements
- Land management of the site
- Expenditure within SG approved budget
- Communication about the installation
- Development of Snow Roads Scenic Route

Not in Scope:

- National Scenic Routes Strategy
- Promotion of National Strategy
- Budget
- Choice of design chosen through competition

2.4 Deliverables

Listed here are the main tangible outputs to be delivered by the project.

| Deliverable | Description | Timetable |
|------------------------|---|---------------------------------|
| Competition | Winning entries judged | 29 th September 2015 |
| Project Team | Professional technical team in place to support the winning designer to deliver the project | I October 2015 |
| Design | Design finalised to allow planning permission and tendering | 2 nd November 2015 |
| Tender | Manufacture and installation contracts tendered | 25 th January 2016 |
| | Manufacture and installation contracts let | 22 nd February 2016 |
| Planning Permission | Consent submitted | 9 th November 2015 |
| | Consent Granted | 19 th February 2016 |
| Land owner consent | Land Management Agreement in Place | I st March 2016 |
| Installation | Site works start Site works completed | Tbc |
| Opening | Formal opening and communication about the project | Tbc |

2.5 Assumptions/Constraints/Dependencies

Assumptions:

- SG Budget confirmed
- Land Owner support
- Roads Authority Support
- CNPA support

Constraints:

- Installation budget fixed £180,000
- Time to be delivered by Spring 2016
- Climate exposed wintery site

CAIRNGORMS NATIONAL PARK AUTHORITY Finance and Delivery Committee Paper 2 Annex I 29/01/16

- Quality must be of a quality to meet Scenic Routes criteria
- Design must deliver the competition winning design

Dependencies:

- Competition Results and timescale SG
- Appointment of technical project team CNPA
- Land Management Agreement CNPA
- Planning Consent CNPA
- Tendering of contracts CNPA
- Approval of Budget SG
- CNPA capacity CNPA/COAT
- Weather undetermined

2.6 Project Budget

2.6.1 Available Project Budget

| From: | Amount | Financial Year | Notes |
|------------------------|----------|----------------|---|
| Scottish Government | £160,000 | 2015/16 | Installation Costs Uplift direct to CNPA budget |
| Scottish Government | £33,000 | 2015/16 | Project Management Uplift direct to CNPA budget |
| | | | |

2.6.2 Funding Constraints

- Scottish Government funds allocated for 31/03/2016
- Subject to VAT

2.6.3 Details of capitalised items and RAB implications

Structures are likely to be capital items classified as 'works of art'. Further discussion with D Ralph required.

2.7 Statutory Approvals/Assessment required for project

| Approval required | Details | Contact Officer for Advice |
|-------------------------------------|--------------------|----------------------------|
| Environmental Impact Assessment | NA | Matthew Hawkins |
| Equality Impact Assessment | Undertaken | Elspeth Grant |
| Procurement Rules | Undertaken with AJ | Daniel Ralph |
| Planning Consent | Applied | Jane Shepherd |
| Strategic Environment Assessment | NA | Gavin Miles |

2.8 Operational and Maintenance Considerations (if applicable)

How will the outputs and deliverables from the project be supported once the project has been completed? Describe the anticipated requirements for the operation and maintenance of the project deliverable/s*.

| Deliverable | Staff resource required | Training requirements | Costs |
|-----------------------------|-------------------------|-----------------------|--------------------------------|
| Maintenance of Installation | I day per year | | Negligible in first five years |
| | | | |
| | | | |
| | | | |
| | | | |

^{*}All figures are estimated and are based on current operational arrangements

2.9 Benefits

List here the expected benefits of the project and how you will measure them.

| Anticipated Benefits | How will it be measured? | Expect realisation date of benefit/s |
|---|---|--------------------------------------|
| Pilot for National Scenic Routes initiative | National media coverage SG appraisal of process Feedback from winning designer | Aug 2015 |
| Increased visitor numbers Enhanced visitor experience | Feedback from local businesses | Oct 2016 |
| These two installations along with the new structures at Corgarff and existing attractions create the Snow Roads Scenic Route | Feedback from local businesses | Oct 2016 |
| | | |

3. Initial Business Case

Outline the business case here and/or provide a link/reference to the Expenditure Justification Form

These works, along with Corgarff 2015, are part a pilot project developed by Scottish Government (SG)

We have been successful in presenting the case for investment in sites on A939/A93 route from Grantown-on-Spey to Glenshee – the Snow Roads Scenic Route.

Communities in Tomintoul, Glenshee and Braemar have identified the need to increase the number of visitors entering the National Park along A93/A939 and to improve a number of run down lay-bys along this route. The Tomintoul site was identified in the **Tomintoul and Glenlivet Development Plan** and the Devil's Elbow site was identified in the **Mount Blair Community Action Plan 2013-18.**

The long term aim is to increase visitor numbers and visitor spend by creating an attractive and well promoted Scenic Route that encourages visitors to experience the outstanding landscapes of Eastern Cairngorms.

3.1 Project Justification

| Business Priority | Business Plan Objective | Any other strategic initiatives/legislation |
|----------------------|--------------------------|---|
| Scenic Routes | Corporate Plan Objective | NPP3 Consultation Draft – in development |
| | | |

Note: If the project is not in the Business Plan for that financial year, then a full business case will require to be developed and presented to the NPA Executive for approval to proceed.

3.2 Feasibility Study/Options Paper

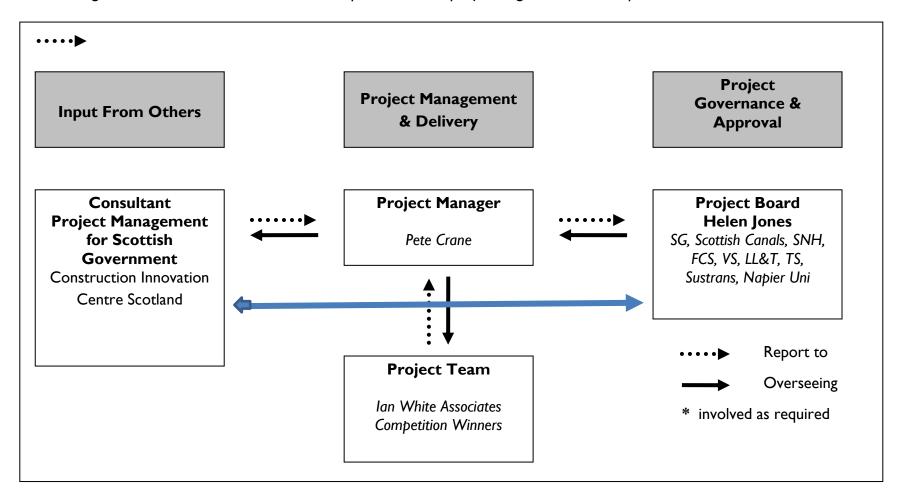

Outline feasibility study or options paper/analysis here and/or provide a link/reference to the Expenditure Justification Form.

Project approved for pilot by Scottish Government as part of the National Scenic Routes Initiative.

4. Project Organisation Structure

4.1 Overall Structure

Insert a diagram or table here to illustrate the composition of the project organisation. Example below.

4.2 Internal resources required (project phase)

| NPA Staff Member | Role within project team | Effort Required (No. of days & timescales) | Specific areas of work | Approval for resources |
|------------------------|--------------------------|--|---|------------------------|
| Pete Crane | Project Manager | 30 Days | Liaison with National Working Group Liaison with Project Team Liaison with Land Manger CNPA Internal Communication Budget Control | |
| Hamish Trench | Project Champion | 5 Days | Liaison with National Strategy Group Board Communication | |
| Communications Team | Communication s Support | 3 days | Communications about launch/opening of site and adhoc responses to publicity requests | |
| Hayley | Ecologist | 2 days | Site appraisal | |
| Francis Thin | Landscape Architect | 2 days | Technical Support | |
| | | | | |
| | | | | |
| | | | | |

4.3 Internal resources required (post project phase)

| Role within project team | Effort Required (No. of days & timescales) | Specific areas of work | Approval for resources |
|--------------------------|---|--|---|
| Project Manager | 5 Days | Liaison with National Working Group Liaison with Project Team Liaison with Land Manager CNPA Internal Communication Budget Control | |
| Project Champion | 1 Day | Liaison with National Strategy Group Board Communication | |
| Communication Support | I Day | Communications about project and ad-hoc responses to publicity requests | |
| | | | |
| | | | |
| | Project Manager Project Champion Communication | Project Manager Project Manager I Day Communication I Day | Project Manager S Days Liaison with National Working Group Liaison with Project Team Liaison with Land Manager CNPA Internal Communication Budget Control Project Champion I Day Liaison with National Strategy Group Board Communication Communication I Day Communications about project and ad-hoc responses |

5. Project Controls

Please detail a list of controls which will be implemented throughout the project. The list below is an example only.

Project Team Meetings Monthly

Project Board Meetings Monthly in Glasgow with regular updates provided.

Project Team Monthly – CNPA, IWA, CICS

Risk Register The Risk Register will be reviewed and updated as and when

necessary and any significant deviations from the plan will be

highlighted to the Project Board.

Project Budget The project budget will be reviewed at each Project Team Meeting

and summary reports on status will be provided for Project Board

Meetings.

Progress Report Progress reports will be prepared for Project Board Meetings

and will contain the following information: Progress against milestones, Programme highlights, Checkpoint Reports, Stage Plans, Progress against project plan, Key Risks and Issues with actions taken or planned, Actions for the next period and Any

other relevant business.

End of Project Report A final end of project report will be prepared by the Project

Managers and presented to the Project Board at the end of

the project.

6. Communications Plan

The Communications Plan should define how the project will manage communication with your stakeholders – both internal and external. The Communications Plan will need to be a "living" document and needs to be revised and updated throughout the project lifecycle.

Initial Project Timeline (approximation)

7. Initial Risk Register

Please hyperlink your Risk Register with the initial risks that you are aware of at this time.

Key Risks

- Lack of Quality Control and Design
- Landowner Consent
- Roads Authority Support
- Relationship management with designer
- Planning Consent
- Lack of time
- Budget
- Inclement weather
- Lack of public support dislike of design and 'waste of money'

Specific Consideration

CNPA is the 'owner' of this project and in order to progress this will need to enter into a land management agreement with the land owner to maintain the installation for a period of at least 10 years.

Aberdeenshire Council as roads authority will retain responsibility for the lay-by.

Scottish Government funding is for the current financial year and both delays due to adverse weather and planning requirements could put delivery by March 2015 at risk. We are scheduled to have all procurement in place by January and works started as soon as possible allowing potentially accrual of expenditure on a nearly complete project, or alternatively negotiate funding terms with Scottish Government that allow us to put in place appropriate yearend financial measures.

SCENIC ROUTES PHASE 3 RISK REGISTER

| ID | Risk | Туре | Impact | Lkhood | Score | Controls | Owner | Revised |

8. Project Manager's recommendation to proceed

Corgarff has been developed by CNPA as part of Scottish Government as a pilot project for the National Scenic Routes Initiative. The two sites at Tomintoul and Glenshee are a second phase of this work and their installation creates a coherent scenic route along A939/93

The installations have been designed as part of a National Competition.

Funding has been secured to deliver the entire project from Scottish Government.

CNPA input is restricted to staff time, and a commitment to maintain the site after development.

The works promote understanding and enjoyment of the National Park and sustainable economic development.

The main risks associated with this project are:-

- Can it be delivered on time
- Can it be delivered on budget
- Can it be delivered to the required quality
- Will local and public perceptions be positive

We have in place the actions and controls to ensure, to the best of our ability, that the project succeeds on all counts and is the first of several along this route. Therefore, I recommend that we proceed on the basis outlined in this document.

Pete Crane Head of Visitor Services
