

7. Next Steps

- 7.1** This round of public consultation will come to an end on 30 June 2008. Staff from the Cairngorms National Park Authority will record and analyse all of the comments, objections and representations received. There will then be a three month period when staff will work with any objectors to try and resolve their objections. If, however, there are any objections that cannot be resolved then the Plan may be subject to a Public Local Inquiry by the Scottish Government Inquiry Reporters Unit. If this is the case then Scottish Ministers will give direction to the CNPA as to whether or not to adopt the Core Paths Plan and about any modifications that need to be made.
- 7.2** Once the Plan is adopted there will be a significant amount of work to be done on the ground to ensure that all of the paths are waymarked, promoted and are in appropriate condition. It is likely that some new paths will require to be built.

Use of Ordnance Survey Mapping

This Draft Core Paths Plan is illustrated with maps to clearly show the geographic location of proposed core paths for the purposes of consultation. This document contains mapping data which is the property of Ordnance Survey and any unlawful use or copying other than for the purpose of viewing and printing is prohibited. The document is for reference purposes only. No further copies may be made. The representation of features or boundaries in which Cairngorms National Park Authority or others have an interest does not necessarily imply their true positions. For further information please contact the appropriate authority.

Annex 1 – List of Proposed Core Paths

The following table provides a full list of the proposed core paths in this Plan, these paths are also shown in separate tables adjacent to the associated maps in Section 6 (see page 17). This table also indicates where a path was proposed in the Interim Draft Core Paths Plan but has subsequently been removed from the proposed network. These paths are shown in *italics*. If you would like to find out why any of these paths are no longer proposed as core paths please contact us.
