

Cairngorms consultation - Insh

Hi

If I'm too late, don't worry. I just wanted to make a couple of observations regarding Insh:

1. No problem with the house site, but why is it outwith the proposed settlement boundary?
2. I agree with the protected open space, but perhaps it should be expanded to include the shelterbelt on the eastern boundary. There is a watercourse through this which then flows underground to emerge as a spring at the back of Greenfield cottage. This was the old village water supply and feeds into Insh Marshes. The water quality should be protected.
