Subject: Robertson green space complaint

Sensitivity: Normal

Dear Gavin Miles

I would like to send this email to express my concerns about plans to change the status of the pitch from green space to land that can be built on. As a family that lives opposite the pitch this deeply concerns me. I have lived here since the house was established and use the field daily with my daughter. She has learnt to ride her bike on that field and we play football with the surrounding children daily. This is the only green space her and the other kids have to play on. I also use the pitch with a whole team of adults to take part in a fitness class. To take this away from us and have the possibility of flats being built in an already crammed estate would be a real shame to all them who use it and also an eye sore to those visiting the area.

Many thanks

Mercedes hutchison
